

Premier Travertine Pavers

Are you looking for a floor surface that does not get too hot in the summer? Consider travertine! Travertine stays cooler underfoot in summer.

Travertine is a type of limestone that forms in streams often near waterfalls or alongside hot or cold springs.

Many famous buildings are made of travertine. These include Los Angeles' Getty Centre, Paris' Sacré-Cœur Basilica and Rome's Colosseum.

Choose travertine for its durability, reliability, luxury and rich-toned beauty. Travertine integrates seamlessly into a rustic, traditional or contemporary design.

Available in 2 different colours, they are perfect for creating a beautiful new outdoor room in your garden!

And travertine is not just for flooring. Complement the elegance of travertine floors with travertine walls, fireplaces, fountains, benchtops and tabletops.

Durability, reliability, luxury and rich-toned beauty makes Travertine a beautiful choice in traditional or contemporary living.

Premier Travertine Pavers

Ageless classics from the Mediterranean

*Classic Light - warm, creamy tones.
Also available in Silver - cool metallic
and earthy tones'*

Travertine is classically cool

Travertine

Dropfaces & Bullnose

The perfect partner for our travertine pavers are our bullnose and dropface copers. Use them on your steps, the edge of your pool or on bench seats.

Bullnose creates a traditional curved edge finish. L-style dropfaces create a modern straight edge finish. Rounded dropfaces (not pictured) incorporate the curve of bullnose with the elongated look of dropfaces.

Specifications:

Bullnose: 610 x 305 x 30mm
Dropfaces (Rounded or L-Style):
610 x 406 x 20/50mm

Other sizes available on request

Travertine

Classic Light

The colours in our classic light travertine range are creamy and rich while the tones are warm. The colour varies from cloudy creams to warm beiges - shades of clotted cream and biscuit brown swirl and interplay together.
